

Konnect Marketing — Website Copy & Structure Blueprint

konnnectmarketingusa.com · Production-Ready Content & UX Specification

Reference Notes

- **Design DNA (konnnectmarketingusa.com):** numbered 01-06 capability cards, dark/light section contrast, bold two-line hero statement with a single CTA, animated stat counters, client-logo trust strip, closing CTA band. The live URL is currently the unconfigured theme demo (placeholder logos, lorem ipsum, fake NY/Paris office blocks) — this blueprint keeps the visual system and replaces every placeholder with real Konnect structure and copy.
 - **Structural DNA (speedpro.com):** persistent header locator tool (their zip-code studio finder, adapted below to a state-coverage lookup), dual-axis navigation (browse by Service AND by Industry), named project cards tagged with city/state, and a two-track CTA split.
 - Both references inform structure only. All copy below is original to Konnect Marketing.
-

SECTION 1 — GLOBAL SITE ARCHITECTURE & NAVIGATION

1.1 Main Navigation Menu

Header CTA (persistent, every breakpoint): [Button: Get a Free Strategy Consultation]

- **Home**
- **Services** (dropdown)
 - Digital Marketing & Demand Generation
 - Outdoor & Transit Advertising
 - Video Display & Digital Signage
 - Interactive Environments & Motion
 - Creative, Video & Motion Content
 - Lighting, Audio & Events
 - — divider —
 - View All Services →
- **Modular Engagement Model**
- **Portfolio**
- **About**
- **Contact**

Mobile: hamburger menu; Services becomes an accordion; header CTA is replaced by a sticky bottom bar (see Section 4).

1.2 Sticky Utility Header / Top Bar

Thin bar above the main nav, present sitewide:

- **Left:** "Now Serving All 50 States · HQ in New Jersey" — state-coverage indicator
- **Center (Phase 2):** "Check Coverage in Your State" — mini state lookup, adapted from SpeedPro's studio locator, pointed at regional case studies once state pages exist
- **Right:** [phone icon] click-to-call number · "Client Portal" login link

1.3 Footer Architecture

Col 1 — Brand: logo, one-line mission statement, social icons (LinkedIn primary, Instagram/YouTube for production reels)

Col 2 — Services: sitemap links to all 6 pillar pages

Col 3 — Company: About & National Footprint · Modular Engagement Model · Portfolio · Careers · Contact

Col 4 — Coverage & Trust:

- "Primary Markets: New Jersey · New York · Pennsylvania"
- "National Coverage: All 50 States"
- Trust badges: Google review rating, BBB (if accredited), industry association marks
- Repeat client-logo strip (grayscale)

Bottom bar: phone number repeated · © [Year] Konnect Marketing · Privacy Policy · Terms · [Button: Get a Free Strategy Consultation] (mini, right-aligned)

SECTION 2 — HOME PAGE BLUEPRINT

2.1 Hero Section

H1 — headline options:

1. "Start Regional. Scale National. Never Switch Vendors."
2. "One Partner. Every Channel. Every State."
3. "Marketing That Grows the Way Your Business Does"

Recommended: Option 1 — the only version that states the modular differentiator directly in the headline rather than the subhead.

Subheadline: "Konnect Marketing blends digital demand generation with outdoor, transit, signage, and experiential production — deployed region by region, expanded as performance proves out, under one accountable partner."

Primary CTA: [Button: Get a Free Strategy Consultation] **Secondary CTA:** [Button: Call Now – Speak With a Regional Strategist] (tel: link, phone icon)

Visual/video background direction: slow crossfade between physical placements (branch signage, transit shelter, trade show floor) and their digital-attribution overlay (geo-fence

ping, dashboard readout) — visually stating "physical + digital, one system." Dark base, single accent color, bold sans-serif, heavy negative space.

Trust badges / social proof banner (directly under hero): grayscale client-logo strip + 3 micro-stats, e.g. "6 Channels Under One Roof" / "50 States Covered" / "[X] Years in Market."

2.2 The Modular Engagement Framework ("Why Us")

Headline options:

1. "Grow at Your Pace. Never Start Over."
2. "One Model. Every Stage of Growth."

Narrative intro: "Most vendors force a choice: commit to a multi-year, multi-state contract up front, or piece together a different vendor for every channel and every market. Konnect's Modular Engagement Model removes that trade-off."

Step 01 — Regional / Single-Function Start "Begin with one region or one capability — signage across three branches, a transit run in a single metro, one trade show activation. Low commitment, fast proof of concept."

Step 02 — Performance Expansion "Scope expands on your terms as results come in — more markets, more channels, more locations — backed by the same attribution data that proved Phase 1."

Step 03 — Enterprise Multi-State Scale "Konnect becomes your single execution partner across every state you operate in, running digital, physical, and experiential channels through one accountable relationship."

"Zero Vendor Switching" callout box: "Every phase runs on the same team, systems, and creative standards — so scaling up never means re-explaining your brand to someone new."

[Button: See How Modular Engagement Works →] (*links to Section 3.1 page*)

2.3 Core Services Grid (01-06)

[Card Layout: 3-column desktop / 1-column mobile grid, numbered top-left per konnectmarketingusa.com template, dark card face with accent-color numeral, hover lifts card and reveals arrow animation]

01 — Digital Marketing & Demand Generation *Pipeline before, during, and after the physical campaign runs.*

- Paid search & paid social tied to campaign windows
- SEO and content built around service and regional pages
- Performance reporting mapped to OOH/signage flight dates [Explore Capability →]

02 — Outdoor & Transit Advertising *Physical placement, digitally attributed.*

- Static & digital billboards in high-traffic corridors
- Bus, shelter & station transit media

- Geo-fenced attribution tied to foot traffic and conversions ([Explore Capability →])

03 — Video Display & Digital Signage *One dashboard, every screen, every branch.*

- Video walls & projection systems
- Centralized content control across locations
- Real-time updates, multi-location scalable ([Explore Capability →])

04 — Interactive Environments & Motion Screens *Screens people stop for, not walk past.*

- Touch & motion-based engagement
- Custom interactive screen applications
- Location-aware, contextual content ([Explore Capability →])

05 — Creative, Video & Motion Content *The content that fills every screen you deploy.*

- Brand & corporate films
- Explainer & educational video
- Compliance-aligned storytelling for regulated industries ([Explore Capability →])

06 — Lighting, Audio & Events *Where the brand becomes a physical experience.*

- Architectural & event lighting design
- Distributed audio systems
- Trade show builds & executive presentation support ([Explore Capability →])

2.4 Attribution & Technology Spotlight

Headline: "Physical Media. Digital Proof."

Copy: "Traditional outdoor and transit vendors hand you impressions and hope. Konnect wraps geo-fencing around every billboard, shelter, and branch placement, feeding a live dashboard that shows foot-traffic lift, web conversions, and cost-per-visit — not just eyeballs."

- Geo-fenced conversion tracking around every physical placement
- Unified reporting across digital + physical channels, one dashboard
- Monthly performance reviews that directly inform Phase 2 scope decisions

[Button: See Attribution in Action →]

Visual direction: map graphic, pulsing geo-fence rings around pinned placements, converting into a small live-counter readout.

2.5 Proof & Metrics Counter Bar

[Card Layout: dark full-width band, animated count-up on scroll, large bold numerals, thin label beneath]

- [XX] States Covered

- [XXX+] Displays & Screens Managed
- [X.XM+] Monthly Campaign Impressions
- [XX%] Client Retention Rate

⚠ *Placeholders only — replace with verified figures before launch. Publishing estimated stats live is both a trust risk and, depending on framing, a truth-in-advertising issue.*

2.6 Case Study / Project Showcase

[Card Layout: numbered horizontal-scroll or grid, modeled on speedpro.com's "01 – Client: City, State" project cards]

Format per card:

01 — [Industry Type] [Project Type]: [City, State] Challenge → which of the 6 services were deployed → one hard result metric

Placeholders to replace with real work:

- 01 — Regional Credit Union Branch Signage Rollout: Central New Jersey
- 02 — National Retail Chain Trade Show Activation: Las Vegas, NV
- 03 — Healthcare System Wayfinding & Digital Signage: Philadelphia, PA

Use anonymized industry + project type + city if client names require confidentiality.

[Button: View Full Portfolio →]

2.7 Lead Capture Form Block

Headline options:

1. "Let's Map Your First Phase"
2. "Talk to a Regional Strategist"

Subtext: "Tell us where you're starting and what you're solving for — we'll come back with a phased plan, not a one-size-fits-all proposal."

Form fields:

- Full Name
- Company
- Business Email
- Phone
- Region / State(s) of Interest (*dropdown, multi-select*)
- Core Need (*dropdown: Digital Marketing / Outdoor & Transit / Digital Signage / Interactive Environments / Video Production / Lighting & Events / Not Sure Yet*)
- Timeline (*Immediate / 1-3 Months / 3-6 Months / Exploring*)
- Message (*optional*)

[Button: Request My Strategy Session]

Phone alternative trigger (boxed, beside form): "Need immediate answers? Speak to a regional strategist now: [Phone Number] — Mon-Fri, 8am-6pm ET"

SECTION 3 — INNER PAGES STRUCTURE & CONTENT STRATEGY

3.1 Modular Engagement Model Page

Written for procurement & marketing directors evaluating vendor risk — reassuring, governance-minded tone.

- **Hero:** "How Modular Engagement Works" / "A procurement-friendly way to test, prove, then scale a national marketing partner — without a multi-year commitment on day one."
- **The Problem With Traditional Vendor Contracts** — bullets: forced multi-year lock-in; re-bidding every expansion; fragmented vendors per channel/state; no unified reporting across physical + digital.
- **The 3-Phase Model** — expanded from home: typical Phase 1 scope/size, what's measured before Phase 2 unlocks, how expansion decisions get triggered, governance/SLA notes.
- **Traditional Agency Model vs. Konnect Modular Model:**

	Traditional Model	Konnect Modular Model
Onboarding	Repeats with every new vendor	Once, ever
Vendor count as you scale	Grows per channel/state	Stays at one
Contract flexibility	Locked multi-year	Phased, performance-gated
Reporting	Fragmented per vendor	Unified dashboard
Procurement risk	High (multiple MSAs)	Low (single MSA, staged SOWs)

- **Procurement FAQ:** "What's the minimum engagement?" / "How do you measure performance before Phase 2?" / "One MSA or multiple?" / "Can we pilot in a single state only?"
 - [Button: Talk to Us About a Pilot Phase]
-

3.2 Service Pillar Landing Page Template

(exact structure to replicate across all 6 service pages)

1. **Hero** — service name + one-line value prop + [Button: Get a [Service] Quote]
2. **What's Included** — deliverables bullet list
3. **Who This Is For** — 2-3 target business types

4. **How It Fits the Modular Model** — one paragraph tying this service to phased adoption
5. **Visual gallery** — 3-4 image placeholders
6. **Mini case study / stat callout** — specific to this service
7. **Often Paired With** — cross-sell block, 2 related services linked
8. **Closing CTA** — [Button: Get a [Service] Quote]

Worked example — Video Display & Digital Signage:

- Hero: "Video Display & Digital Signage" / "One dashboard, every screen, every branch." / [Get a Signage Quote]
- What's Included: video walls & projection systems; branch and corporate digital signage; centralized content management; multi-location scalability; real-time content updates
- Who This Is For: multi-branch financial institutions, corporate HQs/lobbies, retail chains
- Modular fit: "Start with signage in your flagship branches — expand chain-wide once lift is proven."
- Often Paired With: Interactive Environments & Motion · Creative, Video & Motion Content
- Closing CTA: [Get a Signage Quote]

(Services 01, 02, 04, 05, 06 follow this identical skeleton with swapped deliverables from Section 2.3.)

3.3 Portfolio / Industry Work Page

- **Hero:** "Work That Spans Every Channel — and Every State"
 - **Filter bar:** [Filter: Region ▼] [Filter: Capability ▼] [Filter: Industry ▼]
 - Industry options: Financial Services/Banking · Retail · Healthcare · Education · Corporate/Enterprise · Hospitality · Government
 - **Grid:** numbered project cards — thumbnail, industry type, city/state, capability tags, "View Project →"
 - **Closing CTA:** "See how a modular rollout could work in your region" → Contact
-

3.4 About Us & National Footprint Page

- **Hero:** "Built to Move Brands — Physically and Digitally, Everywhere You Operate"
- **Origin/mission** — NJ HQ roots, growth into national coverage (2-3 short paragraphs)
- **Why We're Different** — single-vendor model, modular engagement, physical+digital bridge, geo-fenced attribution
- **National Footprint visual** — US map, covered states highlighted, hub markers
- **Leadership/team teaser** (optional)
- **Trust strip** — client logos, years in market, stats repeated from home

- [\[Button: See Our Work\]](#) • [\[Button: Start a Conversation\]](#)
-

3.5 Contact & Consultation Page

- **Hero:** "Let's Build Your First Phase"
 - **Two-column layout:**
 - Left: lead form (same fields as 2.7)
 - Right: phone (large, click-to-call), email, NJ HQ address, embedded map, office hours
 - **Booking tool:** [\[Embed: Calendly/HubSpot Meetings – "Prefer to grab a time directly? Book a 20-Minute Strategy Call"\]](#)
 - **"What Happens After You Submit"** mini timeline: 1) Regional strategist reviews within 1 business day → 2) 20-min discovery call → 3) Phase 1 proposal scoped to your region and budget
 - **GMB-aligned line:** "Prefer to call? **[Phone]** — connects directly to your regional team."
-

SECTION 4 — CONVERSION OPTIMIZATION & CALL FLOW STRATEGY

CTA & Call Flow — 5 Recommendations

1. **Mobile:** sticky bottom bar, two buttons — [\[Call Now\]](#) + [\[Get Quote\]](#) — persistent at every scroll depth. **Desktop:** CTA stays in the fixed header; phone number lives in the utility bar, never buried in a menu.
2. Use a **trackable, dynamic phone number** (CallRail-style) sitewide so every source — organic, GMB, paid — gets clean call attribution, reinforcing the same attribution story the brand sells.
3. Vary the CTA verb by funnel stage: top-of-funnel pages → "Learn More" / "See How It Works"; bottom-of-funnel pages (service pillar, contact) → "Get a Quote" / "Talk to a Strategist." One generic CTA everywhere flattens intent signals.
4. On mobile, put **click-to-call above the form**, not below — signage/OOH searches skew local-intent and convert by call far more than by form fill. Desktop can stay form-first.
5. Add a **scroll-depth-triggered secondary CTA** (e.g., past 60% on a service page): a slide-in offering a call or email capture for users who won't complete a full form.

GMB & Local SEO — 5 Recommendations

1. Build GMB service-area profiles aligned to the states actually served, each pointing to a matching state/region landing page (Phase 2 build) instead of the generic homepage.
2. Match GMB's primary category and services list exactly to the 6 service-pillar names, giving Google's local pack direct one-to-one relevance to the site structure.
3. Turn every completed project (Section 2.6 / 3.3 cards) into a GMB post + review request — same asset, two jobs.

4. Use a **separate call-tracking number on the GMB listing** from the one on the website, so GMB-originated calls are cleanly isolated in reporting from web-originated calls.
 5. Publish state/region landing pages with unique, non-duplicated copy and an embedded map — the single highest-leverage local SEO lever for a multi-state business, and a direct extension of "start by region" from the Modular Engagement Model itself.
